

Airport CDM @ FCO

General Informations

Leaflet 7

Informations

1. The request for READY has to be done within TOBT+5min;
2. READY will be issued only when the a/c is actually ready, otherwise TOBT will be deleted.
3. If the a/c, after the ADRT, would be effectively not ready, the TOBT and the TSAT will be cancelled and a new TOBT shall be declared
4. ASAT must occur within TSAT + 5 min or ARDT +5 min, depending on which of the two is greater.

Start-up Procedure

1. The pilot contacts Airport Coordination Centre on VHF 121.725 MHz frequency asking for the READY status

2. The Airport Coordination Centre checks that the a/c is really READY and releases it to the TWR. The pilot will monitor 121.8 MHz Delivery frequency waiting for the start up approval.

3. ATCO Delivery checks the consistence of the flight details and issues the start up clearance.
